

Quick Start Guide

Thank you for purchasing the ion AIR PRO HD sports video camera. The ion AIR PRO can be mounted with the Bike & Helmet Kit or the BOARD Kit for the ultimate adventure HD recording experience.

Getting to know your AIR PRO camera

- ✓ AIR PRO is a **Professional, High Quality Digital Video Recorder** that records in Full HD video by using an easy slide switch
- ✓ It also has the latest **5 Mega Pixel Sensor** for you to take great digital photographs
- ✓ Your camera supports a MicroSD card up to 32GB, which allows you to take video in **1080p with 30 frames per second for about 4 Hours.**
- ✓ The embedded **1200mAh Li-ion Battery** can be recharged quickly.
- ✓ The **Waterproof Housing** lets the camera perform up to 10 meters under water.
- ✓ AIR PRO is lighter than **4.5 ounces or 123g.**

1. Getting to Know Your Camera

1	Power	1. Turn the camera on or off 2. Take single photograph
2	LED indicator	Show the camera status
3	Recording Slide Switch	Slide to start or stop video recording
4	Lens	High quality lens
5	MicroSD card slot	MicroSD card storage location.
6	AV port	Connect the camera to TV via Composite cable
7	Mini HDMI Port	Connect the camera to TV via HDMI cable
8	Video Resolution Switch	Select video resolution: FHD (Full HD) or HD.
9	USB Port	1. Connect to computer for data transfer or camera setup 2. Charge your camera
10	Reset button	Reset the camera
11	PODZ Socket	Connect PODZ to the camera to achieve additional function

2. Using Your Camera

2.1 Charging up Your Camera

Charge your camera with either the USB cable or AC/DC adapter. The red LED lights up to indicate the camera is charging and turns off as soon as the camera has been fully charged. It takes about 3 hours to fully charge the camera.

2.2 Inserting a Memory Card

Insert a MicroSD card (not included) before using your camera. Assure that the camera power is turned OFF before inserting the card to the slot.

Notes

1. There is only one correct direction to insert the MicroSD card into the slot. Do not force the card into the card slot as it may damage both the camera and the MicroSD card.
2. A new MicroSD card should be formatted before using. For more information, please see section 3.1 and 3.2

2.3 Set up Date and Time

Connect your camera to a computer and run the ion software from the MicroSD card folder. You can set date and time on the camera through the settings page. Please see section 3.1 to open ion software

2.4 Recording Video

Before starting recording, select the video resolution by switching the Video Resolution Switch

There are two methods available for starting the video record function. When starting a video recording, a short vibration indicates recording started. The LED indicator illuminates RED throughout the recording.

1. Whether the camera power is ON or OFF, simply slide the Recording Slide Switch  from STOP to REC to start recording.

2. When your camera is OFF and the Recording Slide Switch  is at REC location, press and hold the Power  button to turn the camera ON and it will start recording.

Move the Recording Slide Switch  from REC to STOP to stop recording. The camera will vibrate and the LED indicator will illuminate GREEN to indicate the recording has stopped. The camera will then enter Standby mode.

An additional option is to hold the Power  button to stop the recording and turn the camera off. The camera will vibrate two seconds and the Green LED light will turn off.

Notes

1. An additional WQVGA (432x240) video file will be created simultaneously with the recording of an HD/FHD video file. The smaller WQVGA file size allows for more efficient uploading of content to social media sites and email.
2. Changing video resolution is disabled during video recording.
3. There will be around 1-2 seconds delay before the camera starts recording.
4. The various video resolution options for HD and FHD can be changed under the "Settings" selection in the ion software.

2.5 Taking Photos

1. Turn on the camera by pressing the Power  button.

2. After the camera power has been turned on, press the Power  button to take a photo. A short vibration and a flash of Green LED indicate the action was successful.

Notes

1. The Still Photo function is disabled during video recording.

2 Change photo resolutions and shot mode (Single Shot, Burst Mode and Time Lapse) through the "Settings" section on the ion software.

2.6 CamLOCK Mount System

ion's versatile CamLOCK Mount System allows you to attach the AIR PRO camera to any type of helmet (bike, motorcycle, ski, skydive etc.), pole, board (surf, skate, ski etc) and handlebar (bike and motorcycle).

Please refer to the specific mounting guides for instructions on how to install your mounts with your camera for particular activities.

3. Connecting Your Camera

3.1 Connecting Your Camera to a PC

To open the ion software,

1. Inserted a MicroSD card into your camera and make sure there is at least 2MB free space.
2. Connect your camera to a PC via the USB cable included.
3. Press the Power  button to turn the camera
4. Open the MicroSD folder and you will find the file "ion.exe".
5. Double click the file to open

Once you open the software you can:

1. Browse the files saved in the camera
2. Change the camera setting
3. Link to the ion website and cloud service
4. Check the firmware update

Notes

1. If you cannot find ion.exe at your MicroSD folder, you can unplug the cable from PC and turn the camera on and off once and connect the PC again.
2. If you are a Mac user, visit the ion website (www.iontheaction.com) to download the software in Mac version.

3.2 Connecting Your Camera to a TV/HDTV

You can connect your camera to a TV or HDTV via the Composite RGB (included) or an HDMI cable (not included). Once you are connected you can:

1. Take photos or videos by using your TV as a viewfinder
2. Playback any photo or video files saved in the camera
3. Delete any files saved in the camera
4. Format the MicroSD Card

3.3 Sign up for Free ion Cloud Storage

You can sign up 8GB of free Cloud storage for storing and sharing of video and photo content. Enter www.iontheaction.co.uk/ioncloud to sign up.

4. Troubleshooting

Problems	Causes	Solutions
1. LED flashes and camera turns off 2. Cannot turn on the iON camera	Battery is depleted	Recharge the camera
Red LED flashes during recording	Low battery	Recharge the camera
Cannot take photos or video (Green LED flashes)	Memory full	Replace with a memory card with space available for contents
Cannot take photos or video (Green and Red LED flashes alternatively)	1. MicroSD card is not inserted 2. MicroSD card has not been formatted properly.	1. Insert a SD card 2. Format the MicroSD card at PC
Cannot find removable disk after connecting the camera to the computer.	Connection failure.	1. Make sure all cable connections are secured and restart the computer if necessary. 2. Try a different USB port.

5. Specification

Sensor	5 Mega pixel CMOS sensor
Lens	170° ultra wide angle field of view
Focus range	0.5m - ∞
Video	1080p: 1920x1080 pixels (16:9), 30 fps
	960P*: 1280x960 pixels (4:3), 30 fps
	720p: 1280x720 pixels (16:9), 60 fps
	720p *: 1280x720 pixels (16:9), 30 fps
	Format: H.264 compression, saved as MPEG4 (.mp4) file Dual Video files for easy sharing
Photo	Resolution: 5 Mega Pixel in JPEG format
	Capture Modes: Single, Burst-shot*, Time lapse*
Audio	Built-in high quality microphone
	AAC Compression, Automatic Gain Control
Storage	MicroSD/MicroSDHC with minimum Class 4 up to 32GB (not included)
	Average Recording Times: about 4 hours (using 32GB mSD card in 1080p30/720p60)
Connection	USB2.0 (for data connection and battery charging)
	HDMI
	AV / Composite
Power	Build-in 1200 mAh Rechargeable Li-ion Battery
	Battery Life: Approx. 2.5 hrs / 1 hr (w/ WiFi)
Housing	High quality Aluminum barrel and rubberized finishing
	Depth up to 30 feet / 10 meters
Dimension	40 x 40 x 107 mm
Weight	4.3oz(123g)

* Settings can be changed through ion software

Caution Statement

"Modifications not approved by the party responsible for compliance could void the user's authority to operate the equipment."

Instruction Statement

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

WARNING: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THE DEVICE. ANY SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
